

Tall Vertical Frames

Tall Vertical Frame

Our tall vertical frame is a new custom frame where each 8X10 is individually framed instead of using a matte board to create the series. Then the entire series is framed together, creating a solid long frame.

The frame is priced \$90 per 8X10 hole (you can custom choose the number of portraits you would like in your series)

This frame is custom made, so you can choose any size portrait or number of portraits you would like your series frame to be. Please see studio for price on other sizes.
